NetScore

NETSUITE ONE STOP
SOLUTIONS FOR RETAIL AND
WHOLESALE DISTRIBUTION

End-to-end Solution

NetScore provides an end-to-end solution for retail, e-commerce, and wholesale distribution verticals – from ERP setup, webstore development, and third-party systems integration, to online marketplace connectors like Amazon & eBay.

Strong Oracle+NetSuite Partnership

As a 10+ year partner, NetScore is aligned with Oracle NetSuite's leading practices. This alignment ensures a clear understanding of the technological directions Oracle NetSuite is heading, an efficient development process, and a quality end-product for your business.

Highly Scalable

NetScore has proven success in helping both startups and established organizations realize the benefits of cloud ERP to grow and scale their business using today's leading practices.

Cost Effective

NetScore focuses on design, prototyping, and documentation to maximize efficiency, control waste and reduce implementation and ongoing maintenance costs for your business.

NetSuite ERP Implementation

Improves Business Processes and Handle Day to Day Operations More Efficiently
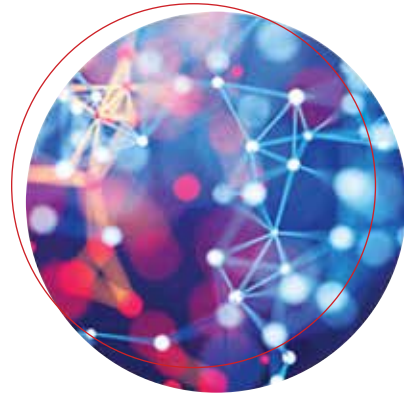

Oracle NetSuite provides a robust and comprehensive ERP solution for your business needs. At NetScore, we provide end-to-end NetSuite ERP implementation services combined with extensive industry experience to address your unique business requirements. We don't just implement; we also advise our customers on leading practices to achieve their business objectives. Beyond implementation, we provide proper user training and user manuals to ensure your team can execute seamlessly and independently.

NetSuite Integration

Streamlines Multichannel Sales & Automate Inventory Management

NetScore delivers a high-quality, fully customizable solution that connects NetSuite with marketplaces, web stores, shipping logistics, Electronic Data Interchange (EDI) and other integrations. We streamline multichannel sales by integrating NetSuite with all your systems and provide fully automated item and inventory management, order processing, shipments processing, and returns/refunds - all leading to improved business results and the best customer experience.

SuiteCommerce Services

Enhances Customer Engagement Through Scalable and Customizable Solutions

NetScore ensures all implementations and customizations are in line with standards established by Oracle NetSuite. As an early NetSuite Commerce Agency Program (CAP) partner, we specialize in website implementation, customization and migrating Site Builder to SuiteCommerce Advanced. NetScore's seamless integration between SuiteCommerce and NetSuite provides real-time data and reports for your web orders.

NetSuite Scripting Customizations

Accelerates Your Business Process and Improves Overall Productivity Through Automation

NetScore performs comprehensive gap analysis based on client requirements and uses proven leading practices derived from numerous successful customizations to identify the best solution for your business. We ensure that our customizations are scalable and flexible for further enhancements. NetScore also provides documentation for your scripting requirements and use cases; this helps end users understand the process altogether.

NetScore Products

NetScore Loyalty Rewards for NetSuite

A robust application that rewards your customers and strengthens relationships while increasing your customer's lifetime value to your business

- Reduces advertising costs while increasing the effectiveness of promotions and motivating customer behaviors
- Awards points to customers automatically and allows easy viewing of their point balance for future redemption
- Increases revenue by driving higher frequency of customer engagement
- Builds lasting relationships and grows your customer base

salesforce ↔ ORACLE NetSuite

NetScore Salesforce Connector for NetSuite

A connector that integrates Salesforce with NetSuite

- Delivers full visibility into your customer data from your front and back office
- Monitors customer credits and refunds in real-time, and tracks sales orders as they process
- Equips sales and back office teams with comprehensive reporting on key business metrics
- Updates Salesforce automatically whenever products/items or prices change in NetSuite and vice versa

"I have been working with NetScore for two years, and they are the only company I can trust to handle my development. It's very frustrating when working with developers, but when working with NetScore, the whole team is with you at every step of the way. The team over at NetScore have always been professional. If you are having an issue with your website or backend of NetSuite, call NetScore, and they will get you back up and running."

NetScore's Connectors Seamlessly Integrate Marketplaces, Webstores, and 3PL with NetSuite

Marketplace Connector Features

- Synchronizes real-time inventory and pricing level
- Imports business reports, and customer and sales orders
- Exports items, fulfilments, levels of price and inventory from NetSuite
- Supports inventory management, order management, return processing and dashboard analytics
- Offers an error handling mechanism

Webstore Connector Features

- Offers bi-directional import/export of customer and order information
- Exports fulfillment and shipment information
- Configures flows from integration dashboard
- Delivers a fully customizable, customer-centric solution
- Stores product information for high data integration

3PL Connector Features

- Provides real-time dashboard analytics
- Imports and exports orders in real-time
- Delivers an improved end-user shipping experience

"We found NetScore's Amazon connector to be very useful for managing multiple SKUs available for sale on Amazon while using NetSuite for inventory hosting. Order creation and fulfillment were easy. And, having tracking numbers for shipped products upload right to the appropriate order, marking it sent and fulfilled on Amazon Seller Central is a tremendous help. Works great!"
